

cv

Personal Information

Name: YunHo Jung

Major: Computer Science & Engineering

About Me

Motivated Computer Science & Engineering student with a strong interest in software development and problem-solving. Experienced in object-oriented programming and software design through academic projects. Eager to expand technical knowledge and apply programming skills to real-world challenges.

Education

Seoul National University

Bachelor of Science in Computer Science & Engineering

Technical Skills

- **Programming Languages:** C++, Python, Java
 - **Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms
 - **Tools:** Git, Visual Studio Code
-

Project Experience

Unity 2D Action Game

- Developed a 2D action game using Unity and C#.
- Implemented character movement, enemy AI, and collision systems.
 - Designed game levels and user interfaces.
 - Collaborated with a team of 3 developers.

3D Interactive Web Experience

Technologies: Three.js, JavaScript, HTML, CSS

- Developed an interactive 3D web application using Three.js.
 - Implemented 3D models, camera controls, lighting, and animations.
 - Designed an immersive user experience with real-time rendering.
 - Optimized rendering performance for smooth browser-based interaction.
-

Activities

- Participated in computer science coursework and programming assignments.
 - Continuously studying software development, algorithms, and emerging technologies.
-
